CHAPTER 1 (2:20–3:40)

1. The ancient history of the people of the Carolinas pre-dates the Egyptian pyramids by _______ years.

2. How many kinds of elephants roamed the Carolinas 10,000 years ago?

CHAPTER 2 (3:40–7:20)

3. How does the geography of North Carolina today compare to its geography 20,000 years ago?

4. What would have been found 300 miles north of the North Carolina-Virginia border at that time?

5. Why didn’t the Outer Banks exist 18,000 years ago?

CHAPTER 3 (7:20–14:37)

6. Why does Dale Russell think we would have “feared for our lives” if we went for a stroll in the North Carolina woods 15,000 years ago?

7. Explain why tree species that we would expect to find in only northern climates are living in North Carolina.
CHAPTER 4 (14:37–18:26)

8. Describe the land bridge theory for the first arrival of humans in North America.

9. What is a “Clovis point”?

CHAPTER 5 (18:26–END)

10. How do scientists use absolute dating/radiocarbon dating to learn the age of paleo-Indian sites?

11. Why might North Carolina archaeologists need to know how to scuba dive?

12. What is the difference between evidence used by historians and evidence used by archaeologists?
